MANAGEMENT

LPLUS
IS A BYWORD FOR COMPETENCE

LPLUS is synonymous with exceptionally secure and flexible online examinations. More than 3 million individual computer-based examinations have already been carried out worldwide with the LPLUS system®. The name LPLUS is synonymous with effective examination management and the system enables customers to meet rigorous educational, technical and legal standards according to their specific requirements. A team of highly qualified IT experts, educators and project managers quickly and expertly grasp every new challenge.

More than 100 satisfied customers across the world from the training and development sector, commerce and industry, higher education institutions and the aviation sector value our know-how and put their trust in LPLUS solutions and innovations.

We are the European market leader in pilot examinations and we also work in close partnership with the African, Chinese and Australian aviation authorities.

RESEARCH AND DEVELOPMENT

Greater flexibility when studying. LPLUS is taking part in an EU-financed project called TeSLA alongside other international partners from the higher education and private enterprise sectors to develop an eAssessment system which guarantees authentication and authorship in online and blended learning environments. A step into the future – with TeSLA it will be possible to control examinations taken at home.

TeSLA
Adaptive trust-based e-assessment

AREAS OF APPLICATION

Training and development
There is a growing acceptance of electronic performance monitoring within professional training and development. In particular, examinations which are organised in a decentralised way and which have to be run at times of peak demand are increasingly benefiting from the strengths offered by LPLUS software. A number of professional examinations are now only offered online.
University education
Now that electronic examinations can be taken for mass study programmes, this means that students no longer have to wait for months on end to receive their examination results; being able to give answers in flowing text makes examinations significantly quicker to assess. All scientific disciplines are suitable for electronic testing; assessment is becoming more objective and examination arrangements are becoming much more streamlined.

Aviation
In the aviation sector, the LPLUS System® supports the global standardisation of training concepts and examination regulations. LPLUS is an expert partner of numerous aviation authorities and aviation schools that operate across the globe. Maintenance personnel and air traffic controllers can also be examined online with LTS PEXO alongside pilots.

THE LPLUS SYSTEM®

PRODUCT OVERVIEW

The LPLUS System® supports the whole of the examination process from the generation of tasks and preparatory training through to registering, holding and assessing examinations and archiving.

The system is hosted on the LPLUS examination servers or on the customers' own intranet sites. The pricing structure is customer focused and brings a rapid return on investment.

LTS Editor
The *LPLUS TestStudio Editor* provides a flexible way to generate tasks in standard and complex formats. Authors can work collaboratively and a comments function supports quality assurance across the process from creating tasks through to the first copy deadline.

LTS3
LPLUS TestStudio3 offers a clearly structured user interface which is workflow-orientated and modular examination arrangements. Various export options and examination certificates are available for statistical analysis. Standard interfaces enable different formats to be quickly interchanged.

LTS PEXO
LPLUS TestStudio Pilots Examination Office fulfils all requirements demanded by the aviation sector. It supports different time zones, verifies eligibility and provides ECQB management and an EMPIC EAP interface.

LTS Trainer
The *LPLUS TestStudio Trainer* module enables you to configure content relating to different examination themes and then prepare the candidates for the exam in a more focused way.

LTS Register
The *LPLUS TestStudio Register* module manages the registration of individual candidates for examination or a whole cohort of students. It simplifies the administrative workflow and streamlines the whole process. It is possible to provide a link to the payment system.

LTS Exam2Go
The *LPLUS TestStudio Exam2Go* enables electronic examinations to also be held in remote locations that do not have internet connections.
