Technical requirements of the workplace

The teststation must fulfil the following mininum requirement

Browser:	All popular browsers (Firefox, Edge, Chrome, Safari, Opera) in the current version
Monitor:	Resolution 1920 x 1080 or higher
Keyboard:	Standard, as quiet as possible
Mouse:	Standard, normal sensitivity
Optional Software [1]:	Adobe Acrobat Reader (please note that the toolbar is not displayed if possible!) Microsoft Office Headphones (please note that the cable length is sufficient)
A specified hard drive capacity, CD/DVD or floppy drive as well printer are no needed.	

[1] only required for complex examination.

Browser settings

PopUp blockers must be disabled.
If you have browser extensions installed (i.e. Google Toolbar), look for additional pop-up blockers.

Javascript must be activated.

Add-on and the like (such as AdBlock) Antivirus solution should not interfere with communication.

Technical requirements of the place (Notes for the administrator)

In general there is no seperated internet connection (exclusive examnetwork) needed. Sufficient bandwidth must be available during the examination period. If a PROXY server is used, it must be completely transparent (this means no manipulation of (HTTP) SessionCookies, **no** Request/Response - Pooling/Caching).

This include firewall as well anti-virus software, these are not allowed to manipulated or cut off the POST/GET files.

At this point we would like to point out that the test operation with WLAN workstations has proven to be problematic (especially with larger numbers of participants). Problems such as disconnections and network latencies occur. We therefore advise against the use of WLAN.
